Start relaxing with the top of your head and then slowly release the tension of your body, one muscle at a time and breathe deeply.

Try to connect yourself with your inner person. There is a person living inside you who always tells you how to act. After a strong situation, it is you that inner person who understands you better than anyone else. So initiate a positive conversation within yourself. Close your eyes and speak to yourself and calm yourself.

Anger is something that releases the tension you have been feeling all the while but who will take care of the reason why you got angry in the first place? It is as simple as a solution that you need. Forgive and forget . It's easier to get the apologies over and done with right away so you can forget about your anger and move on.

Start good one by saying , "I'm sorry" or "I forgive you". Forgiving is a blessing. Spread the goodness. Instead of allowing others to laugh at you, laugh at yourself. Think of all the words you said and think of how you could have changed the situation by acting in a different way.

OLD MAN RIVER

F. Listening input for fill in the blanks

The 2015 South Indian floods resulted from heavy rainfall generated by the annual north east monsoon in November-December 2015. They affected the Coromandel Coast region of the South Indian states of Tamil Nadu and Andhra Pradesh, and the union territory of Puducherry, with Tamil Nadu and the city of Chennai particularly hard- hit. More than 500 people were killed and over 18 lakh people were displaced. With estimates of damages and losses ranging from nearly 200 billion rupees to over 1 trillion rupees, the floods were the costliest to have occurred in 2015, and were among the costliest natural disasters of the year. The flooding has been attributed to the2014-16 El-Nino event.

ON KILLING A TREE

G. *Listen to the speech and complete the exercises that follow.

Nammazhwar was born in 1938 in Elangadu, Thanjavur District, and he graduated from Annamalai University with a B.Sc. in Agriculture. In 1963, he began working for the Agricultural Regional Research Station, a government organisation in Kovilpatti, as a scientist, conducting trials on spacing and use of various chemical fertilizers in cotton and millet crops. During his tenure there, the government had conducted various experiments
