Procedure:

- Take 5 beakers with water and label it as A, B, C, D, E.
- Take samples A, B, C, D, E and add water to the respective beaker.
- Observe the changes in each beaker.
- Record your observations.

Observation:

Sl. No.	Sample	Observation	Indication
1.	A		
2.	B		
3.	C		
4.	D		
5.	E		
6	F		

8. IDENTIFICATION OF MICROBES

Aim:

To identify the different types of microbes (Bacteria and Virus).

Observation:

To observe and identify the following microbes with the help of photograph/picture/permanent slide using a compound microscope/model/biovisual chart.

a. *Escherichia coli*

b. *Vibrio cholerae*

c. *Lactobacillus*

d. *Retrovirus (HIV)*

Answer the following:

a. Draw a neat labelled diagram.

b. Write the shape of the bacteria and virus observed.

c. Mention the structural details of the bacteria and virus.

d. Indicate its microbial importance/disease caused.
