Deformation	Changes in an object's shape or form due to the application of a force or forces.
Iceberg	Large piece of ice floating in water.
Hydraulic systems	Device that uses fluids and work under the fluid pressure to control valves.
Incompressible	No change in volume if a pressure is applied.
Meteorological	Weather condition.
Piston	Movable disc fitted inside a cylinder.
Propellers	Fan that transmits power in the form of thrust by rotation.
Syringe	Simple pump made of plastic or glass to inject or withdraw fluid.
Therapy	Treatment given for healing sickness.
Velocity	Speed of an objects with direction.

TEXTBOOK EXERCISES

I. Choose the correct answer.

1. The size of an air bubble rising up in water
   (a) decreases
   (b) increases
   (c) remains same
   (d) may increase or decrease
2. Clouds float in atmosphere because of their low
   (a) density (b) pressure
   (c) velocity (d) mass
3. In a pressure cooker, the food is cooked faster because
   (a) increased pressure lowers the boiling point.
   (b) increased pressure raises the boiling point.
   (c) decreased pressure raises the boiling point.
   (d) increased pressure lowers the melting point.
4. An empty plastic bottle closed with an airtight stopper is pushed down into a bucket filled with water. As the bottle is pushed down, there is an increasing force on the bottom. This is because,
   (a) more volume of liquid is dispaced.
   (b) more weight of liquid is displaced.
   (c) pressure increases with depth.
   (d) All the above.

II. Fill in the blanks.

1. The weight of the body immersed in a liquid appears to be _____ than its actual weight.
2. The instrument used to measure atmospheric pressure is _____.
3. The magnitude of buoyant force acting on an object immersed in a liquid depends on _____ of the liquid.
4. A drinking straw works on the existence of _____.

III. State whether true or false. If false, correct the statement.

1. The weight of fluid displaced determines the buoyant force on an object.
2. The shape of an object helps to determine whether the object will float or not.
3. The foundations of high-rise buildings are kept wide so that they may exert more pressure on the ground.
4. Archimedes' principle can also be applied to gases.
5. Hydraulic press is used in the extraction of oil from oil seeds.
